

HOOK TYPE HEAVY DUTY SNATCH BLOCK

Product features :

- 1) Comply to ASME standard, safety factor is 4:1
- 2) High strength alloy steel forging, and quenched and tempered heat treatment, stronger tension and more safety.
- 3) Traceability : tracking products testing and certification number and batch number of the product.
- 4) Easy to maintain: configuration for easy operation and maintenance and extension of the service life of carbon steel wheels and butter nozzle.
- 5) JDB bronze bearing : self lubrication, not need oiling often, the general set of 10 times of the service life of general bronze.
- 6) Strong corrosion resistance: spray surface treatment.
